

Revolutionizing Industrial Cleaning: Titan Green Solutions FZC Launches the Bio-Circle HTW Hot Water Parts Washer

Titan Green Solutions FZC proudly unveils the [Bio-Circle](#) HTW Hot Water Parts Washer, an advanced and low-maintenance solution crafted for high-efficiency cleaning and degreasing of industrial tools and components. Designed with a state-of-the-art three-dimensional nozzle system, it ensures complete spray coverage and outstanding cleaning results.

Highlights & Advantages:

- Efficiently tackles medium to heavy contamination on a wide variety of materials including steel, stainless steel, aluminum, plastic, zinc-coated, and other non-ferrous metals.
- Built entirely from premium stainless steel and compatible with acidic, neutral, or alkaline cleaning solutions.
- Features a robust rotating rack combined with a high-pressure spray mechanism for deep, thorough cleaning.
- Delivers energy-saving, cost-efficient, and dependable performance in demanding industrial settings.
- Ideally suited for use in service centers, maintenance workshops, production environments, and manufacturing facilities.
- Incorporates an integrated recirculation system to maximize the longevity of cleaning agents.
- Offered in multiple configurations with internal rack sizes ranging from approximately 800 mm to 1500 mm to meet varied operational needs.
